
(a) Speed, 1396 half-minutes
speed from the app (km/h)
speed by GPS (km/h)
(b) Distance, 47 journeys
shading: within 20%
distance by the app (km)
distance by GPS (km)
(c) Direction, 44 recordings
share of the time (%)
83% within 30°
direction error against GPS (°)
(d) Direction through a ride
compass + turns only
full method
direction error (°)
minutes since the recording began
(e) Whole routes, 44
routes
whole route turned by (°)
(f) The gap as the journey goes on
median
drawn position from GPS (km)
distance travelled (km)
(g) C10: good (10th percentile)
10.9 km, turned +16°
ends 9% of distance off
(h) C46: typical (40th)
4.0 km, turned +11°
ends 16% of distance off
(i) C35: worse (70th)
11.2 km, turned -17°
ends 25% of distance off
(j) C49: poor (95th)
50.6 km, turned -30°
ends 45% of distance off
km
GPS (answer key)
the app, no GPS
start (the one GPS point)
the app equals GPS
